WORK EXPERIENCE

I have been working as a Front-end Developer, and these are some of my projects that I have worked on:

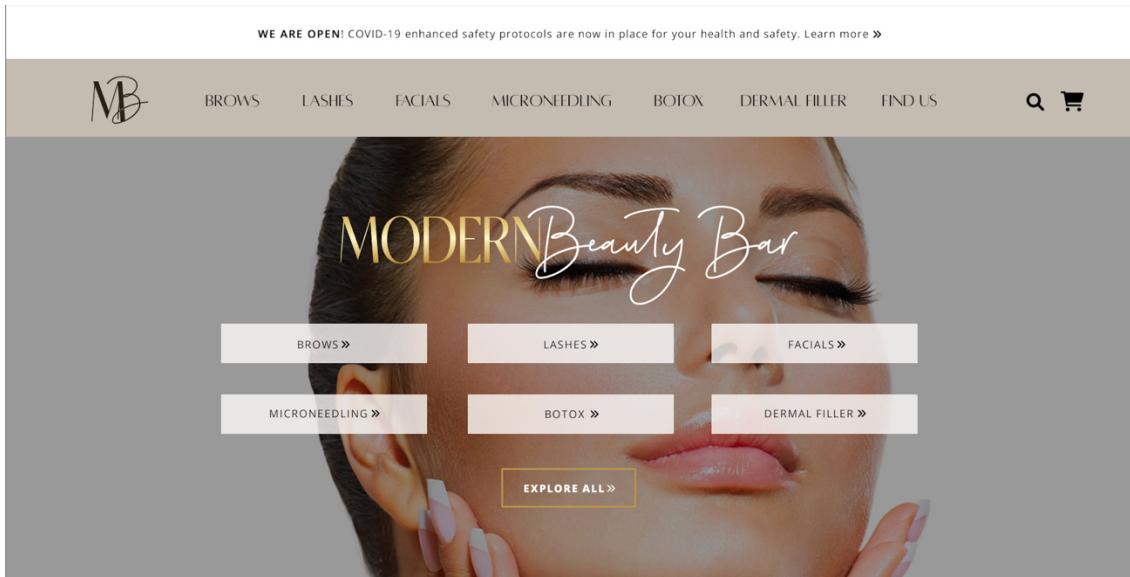

1. Development of an online store made with Shopify (Modern Beauty Bar)

Modern Beauty Bar offers premium Injectable, Brow, Skin, Facial, & Lash Services in Lake Nona, FL.

Used Tools:

HTML - CSS - SASS – LIQUID

See Project: <https://themodernbeautybar.com/>

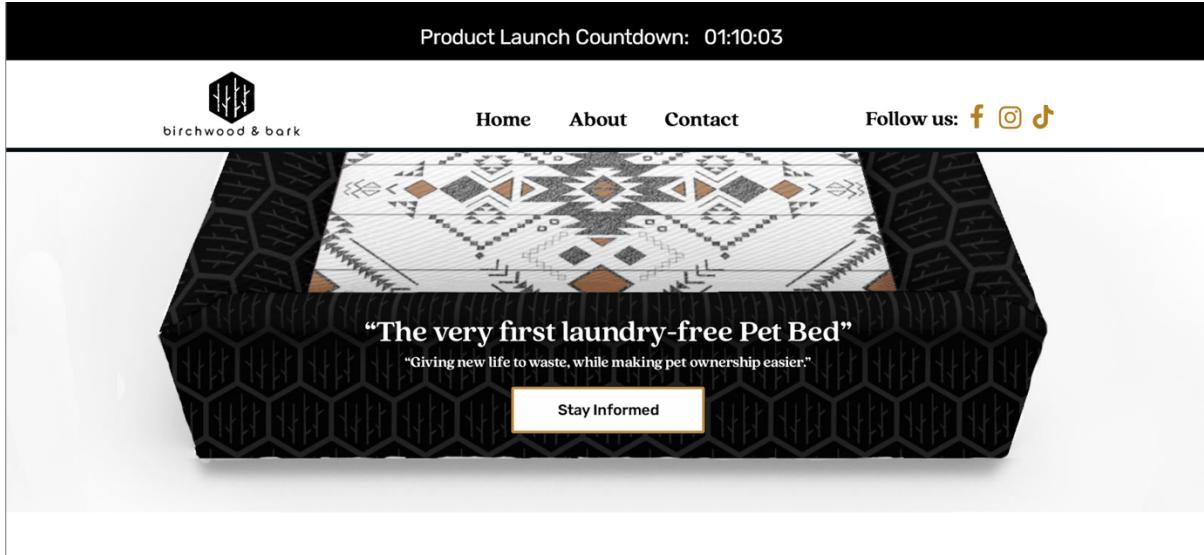

2. Development of an online store made with Shopify (Birchwood and Bark)

A Laundry-Free Luxury Dog Bed. B&B luxury dog bed covers are made from renewable and recycled fabrics, biodegrading in as little as three months' time.

Used Tools:

HTML - CSS - SASS – LIQUID – JAVASCRIPT

See Project: <https://birchwoodandbark.com/>

3. Development of an online store made with Shopify (NancyVuu - Kingdom Heirs)

Driven with purpose and passion, Nancy is consistently pushing her creative boundaries and expanding into new territories. Nancy has managed to elevate her fashion brand from its humble roots to international status. From producing award winning films to her upcoming podcast, jewelry line and children's book series, we are excited for all that is ahead.

Used Tools:

HTML - CSS - SASS – LIQUID

See Project: <https://nancyvuu.com/pages/kingdom-heirs>

4. Development of a Website made with Shopify (Reginald's Gourmet)

Reginald's Gourmet, newly launched in 2022, is a locally owned Orlando company. Committed to raising the bar on snack food, we are proud to introduce the tastiest, most irresistible peanuts ever. And we say when it's time to take a break in your busy day, treat yourself to the best!

Used Tools:

HTML - CSS - SASS – LIQUID

See Project: <https://reginaldsgourmet.com/>

5. Development of a Website made with WordPress (The Menke Corp)

The Menke Corp specializes in custom home construction throughout the Southeastern United States. With a commitment to quality, The Menke Corp is an artisan of exquisite craftsmanship. From foundation to tiles The Menke Corp has built diamond strong relationships with our vendors to enable a remarkably appealing home that will overcome the test of time, every time. From initial planning to closing day, rest assured that your TMC agent is there to make the process informative and smooth every step of the way.

Used Tools:

HTML - CSS - SASS – PHP

See Project: <https://themenkecorp.com/>

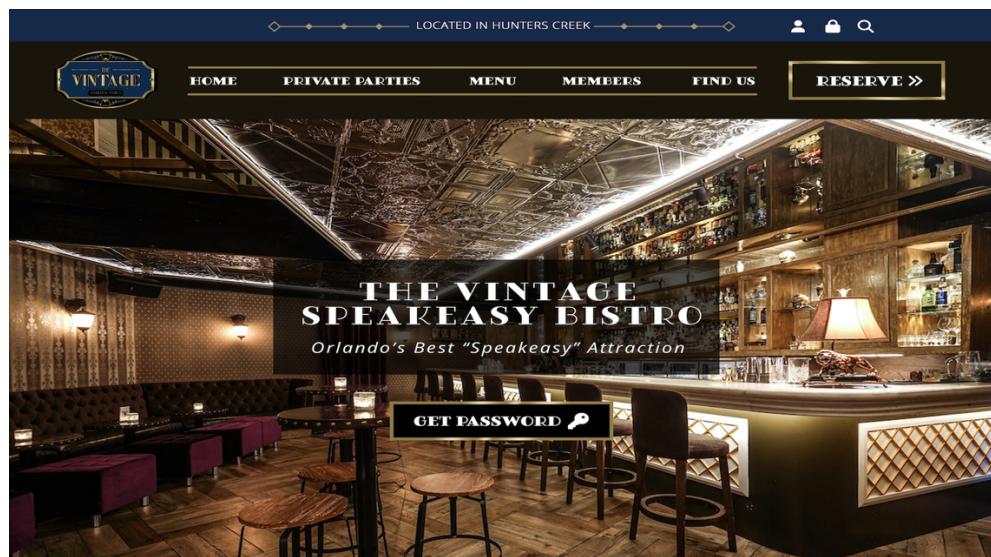

6. Development of a Website made with WordPress (The Vintage Speakeasy)

The Vintage offers a savory handcrafted cocktail experience like no other in Central Florida. Indulge in our prohibition era, themed drink menu with a wide assortment of spirit-based cocktails that will make your taste buds water. Table, lounge, and bar seating is available for a high-end, white-glove experience that you are sure to remember. With premium garnishes, fresh ingredients, and a wide-assortment of liquor, The Vintage has something for almost every palate.

Used Tools:

HTML - CSS - SASS – PHP - JAVASCRIPT

See Project: [https://thevintagespeakeeasy.com/](https://thevintagespeakeasy.com/)

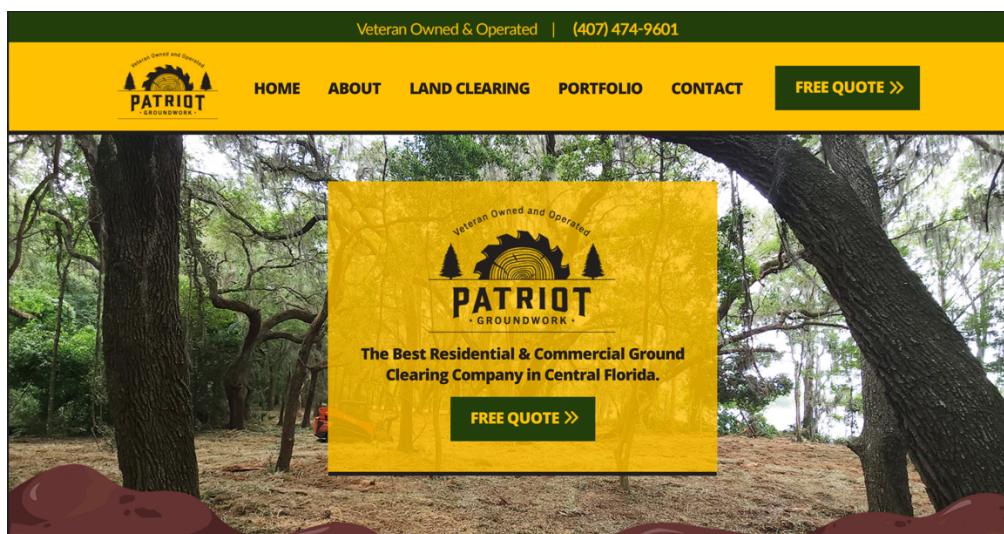

7. Development of a Website made with WordPress (Patriot Ground Work)

The Best Residential & Commercial Ground Clearing Company in Central Florida. With a commitment to quality, Michael Ragsdale's Patriot Groundwork specializes in both residential and commercial land clearing services throughout Central Florida. With a full arsenal of land clearing equipment, no job is too big or small for Patriot Groundwork. Patriot Groundwork services Kissimmee, Winter Garden, Windermere, Dr. Phillips, Oviedo, Maitland, Altamonte Springs, Sanford, Ocala, Lake Nona, and so much more.

Used Tools:

HTML - CSS - SASS – PHP

See Project: <https://patriotgroundwork.com/>

I have been working as a freelancer, and these are some of my projects that I have worked on:

8. Development of Application for Veterinary patients:

In this application each veterinarian must register to start having access to it. Once the veterinarian registers, they will receive an account confirmation email. Once the account is signed, the veterinarian will be able to access it and register the patients he attends. The veterinarian can edit and delete the information about their patients, as well as edit their personal information. Each veterinarian will only be able to see their own patients, maintaining patient privacy.

Used Tools:

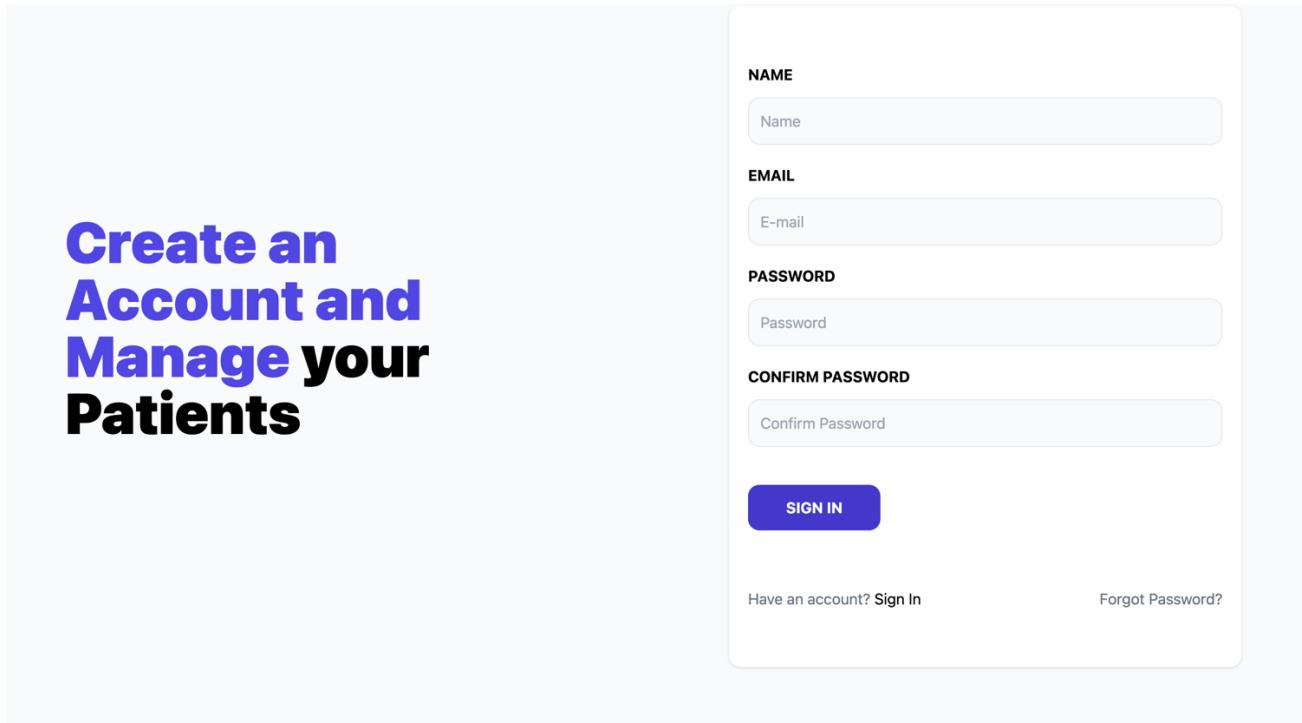

TAILWINDCSS - NODE.JS - REACT.JS - EXPRESS.JS - MONGODB AND MORE

Get in with this user and see how the app works:

User: maria@correo.com Password: 123456

See Project: <https://thriving-creponne-6d3b56.netlify.app>

See Project on GitHub: https://github.com/jfreddyms/APV_MERN_backend

9. Development of an Application to Know About the Current Weather:

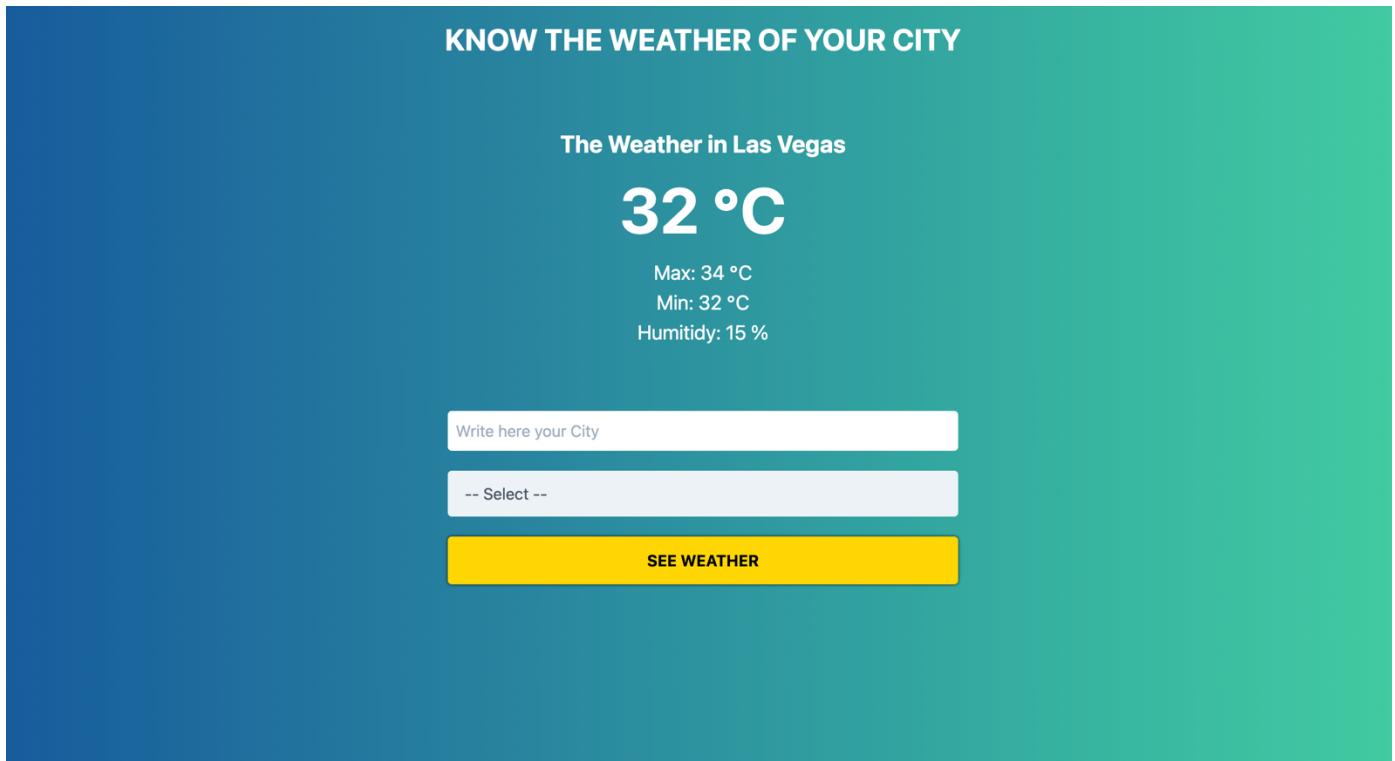

Climate is a very important factor in all our lives. All of us turn to applications, websites, or the news to see what the weather will be when planning our day. This app allows the user to find out the weather specifics including the temperature, minimum and maximum temperatures of the day, etc. Being informed about the weather is important, and the goal of this application is to provide that information to its users.

Used Tools:

HTML - CSS – TAILWIND, APIs AND MORE

See Project: <https://super-mooncake-b8ed1f.netlify.app>

See Project on GitHub: <https://github.com/jfreddyms/weather-app>

10. Development of an Application to Know About the Most Popular Cryptocurrencies

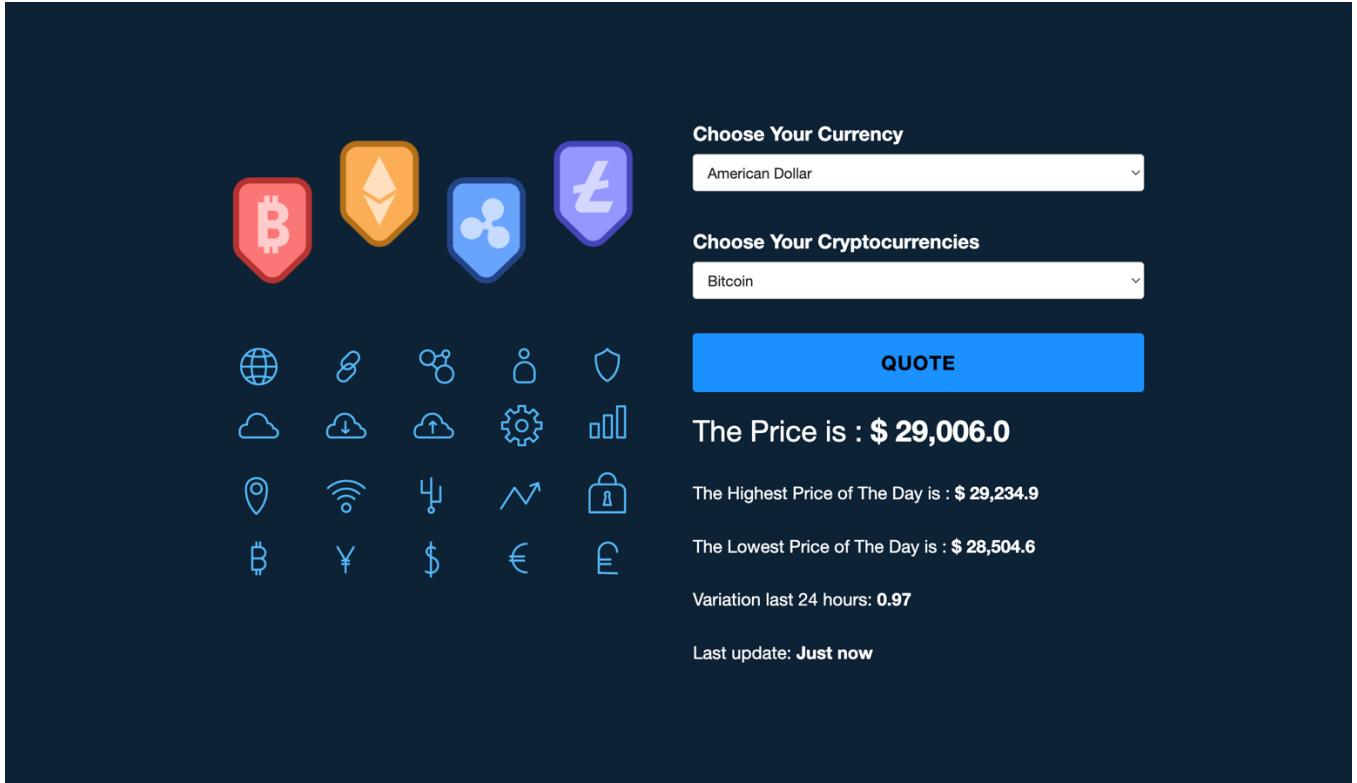

Today, cryptocurrencies have taken a very important role in the financial area. Therefore, this app has the function of providing its users with information regarding some of the current cryptocurrencies, such as pricing. Without a doubt, it is a good application for those who desire to keep up-to-date with cryptocurrencies.

Used Tools:

HTML - CSS - APIs AND MORE

See Project: <https://cute-macaron-dd7d6e.netlify.app>

See Project on GitHub: <https://github.com/jfreddyms/cryptocurrency-app>

11. Development of a Website for a Restaurant

Informational web pages are very often used. This web page has the name of “The cafeteria” and it contains information about a small company that sells coffee amongst other things. This website allows its viewers to explore all of this company’s products, and it gives them the ability to contact the company for purchasing, etc.

Used Tools:

HTML - CSS - SASS - GULP AND MORE

See Project: <https://cheerful-churros-7e5aa4.netlify.app>

See Project on GitHub: <https://github.com/jfreddyms/cafeteria-site>

12. Development of an Application to Search for any Type of Images Using an API:

This project is based on the image search tool using an API. In this app, users can find a variety of images. They can browse various categories, or they can search for something specific by searching the name of whatever image they are searching for. A variety of images will populate and the user will then have the option to download whichever image(s) they wish to use.

Used Tools:

HTML - CSS – TAILWIND APIs AND MORE.

See Project: <https://charming-travesseiro-cd93f9.netlify.app>

See Project on GitHub: <https://github.com/jfreddyms/Image-Search>

13. Development of a Website for a Travel Agency:

Traveling excites us all. When planning a vacation, websites that compare vacation packages can be very helpful, and this website does just that! Viewers would be able to explore 6 different packages to see what each of them have to offer. Once they have traveled, they would be able to leave a comment to inform future travelers about their experience.

Used Tools:

BOOTSTRAP - NODE.JS - EXPRESS.JS - SEQUELIZE - PUG AND MORE

See Project: <https://fathomless-mountain-10782.herokuapp.com>

See Project on GitHub: <https://github.com/jfreddyms/agencia-deployment>

14. Development of a Website for The Sale of Courses:

This website offers various courses for sale. The purpose of this web page is to show the utilization of a shopping cart and how it works. It is coded for using JavaScript.

Used Tools:

HTML - CSS – JAVASCRIPT AND MORE.

See Project: <https://relaxed-pare-fbb682.netlify.app>
